

COVID-19 UPDATE!

The last 5 months have shown us all how scary the unknown can be. The world has seen a once in a century pandemic change life as we know it. Our industry has learned a lot over the last 5 months that will definitely help us in the future be able to provide the highest level of care possible. We have now started testing staff every 2 weeks to decrease the spread of the virus. We also have in place as needed testing for residents. The increase in testing has allowed us to open up our facilities to outside visitation; the outside visitation has strict rules that help protect everyone involved. Our facilities will continue to update the residents and their responsible parties at least weekly and we will continue to promote communication through whatever means possible. The situation continues to change on almost a daily basis with updates coming from the CDC, ODH, and CMS as those changes occur, we will continue to update everyone on the affects it may have on our buildings. In closing I did want to mention that flu season is approaching quickly please make sure if you have a loved one living in the nursing home environment that you seriously think about receiving the flu vaccine. Flu season can be very difficult in a nursing home and now we have to worry about COVID-19 also. If you have any questions please make sure you reach out and we will do everything we can to assist.

Sincerely,

Bill Meyer RN

Corporate Director of Clinical Services
